

Abstract

A plastic control plate for a gearbox control device of a hydraulic motor vehicle is disclosed, which comprises at least one channel (2a, 2b, 2c, 2d, 2e, 2f, 2') extending in the plastic control plate (1) and is used to guide a cooling medium and a  
5 heat conducting body (3) which is at least partially integrated into the plastic control plate (1) and is arranged directly adjacent to the channel (2a, 2b, 2c, 2d, 2e, 2f, 2').
